IT, Data Security & Acceptable Use Policy

Document Ref: POL-IT-001 | Version: 1.0 | Classification: Internal Corporate Security Policy

DOCUMENT CONTROL & GOVERNANCE SUMMARY

Document Ref:	POL-IT-001	**Effective Date:**	2026-01-01
Policy Owner:	Chief Information Security Officer…	**Next Review:**	2027-01-01
Approver:	Executive Board / Chief Technolog…	**Version:**	v1.0
Scope / Audience:	All Employees, Contractors & Thir…	**Classification:**	Internal Policy

1. LEGAL DISCLAIMER & CYBERSECURITY GOVERNANCE PREAMBLE

Please note: This free template policy is for informational purposes only and does not constitute legal or cybersecurity consulting advice. It is a corporate security framework designed to align with ISO 27001, GDPR, and cybersecurity standards. Organizations adopting this template should consult IT legal experts.

Our Organization depends on robust digital infrastructure, customer data privacy, and intellectual property security. This policy outlines mandatory rules governing company laptops, credentials, network traffic, cloud tools, VPN access, and incident reporting.

2. PASSWORD COMPLEXITY, 90-DAY ROTATION & MFA MANDATES

1.1 Password Complexity Requirements:
Passwords must be at least 12 characters long, containing uppercase letters, lowercase letters, numbers, and special symbols (!@#$%^&*).

1.2 Mandatory 90-Day Rotation & Password Buffer:
Passwords expire automatically every 90 days. System rules prohibit reusing the previous 5 passwords.

1.3 Multi-Factor Authentication (MFA):
MFA is compulsory across all single-sign-on (SSO) portals, corporate email accounts, cloud databases, and VPN endpoints.

1.4 Credential Secrecy:
Passwords and OTP codes must NEVER be shared with anyone, including managers or IT Helpdesk technicians.

3. ACCEPTABLE USE OF COMPANY DEVICES & WORKSTATION LOCKING

2.1 Dedicated Business Purpose:
Corporate laptops and desktops are assigned strictly for authorized business tasks. Installing personal gaming, torrenting, or pirated software is prohibited.

2.2 Unattended Workstation Locking:
Workstations must be locked whenever left unattended (Windows: Win + L; macOS: Cmd + Ctrl + Q).

2.3 Hardware Inventory Audits:
IT conducts mandatory semi-annual physical and digital hardware security compliance audits.

4. INTERNET CONTENT FILTERING, EMAIL ETHICS & ENCRYPTION

3.1 Network Traffic Monitoring:
Corporate internet traffic is logged. Streaming video, online gambling, torrent file sharing, and unapproved cloud storage drives are strictly blocked.

3.2 Email Usage & Data Encryption:
Corporate email must not be used for personal commercial subscriptions. Sensitive client records and source code must be encrypted at rest (AES-256) and in transit (TLS 1.3).

3.3 USB Port Restrictions:
USB mass storage ports are disabled by default. Storing corporate data on personal Google Drive or Dropbox is strictly forbidden.

5. REMOTE ACCESS, ALWAYS-ON VPN & BYOD MDM SECURITY

4.1 Always-On Corporate VPN Requirement:
Connecting to company databases, cloud servers, or code repositories from WFH or remote locations requires logging in via the mandatory Always-On Corporate VPN.

4.2 Unencrypted Public Wi-Fi Ban:
Accessing company resources over open public Wi-Fi without VPN protection is strictly prohibited.

4.3 BYOD Mobile Device Management (MDM):
Personal mobile devices accessing corporate email or Slack must enroll in Mobile Device Management (MDM), allowing remote wipe of corporate container data upon employee departure.

6. SECURITY INCIDENT & PHISHING SLA (2-HOUR MANDATORY SLA)

5.1 Mandatory 2-Hour SLA Notification:
Any lost device, suspicious phishing link, malware alert, or potential data breach must be reported immediately to security@company.com within 2 hours of discovery.

7. CYBER VIOLATIONS, SUMMARY PENALTIES & LEGAL ENFORCEMENT

Non-compliance with IT security policies exposes the company to critical cyber risk. Violations trigger immediate account suspension, written reprimand, financial recovery for damages, or summary termination accompanied by civil or criminal prosecution.
